Q: What is Artificial Intelligence?

A: AI refers to the simulation of human intelligence in machines.

Q: What is Machine Learning?

A: Machine Learning is a subset of AI that enables systems to learn from data.

Q: What is a Cloud Server?

A: A cloud server is a virtual server hosted on a cloud computing platform.

Q: What is an API?

A: API stands for Application Programming Interface, which allows software to communicate.

Q: What is a VPN?

A: A VPN (Virtual Private Network) encrypts internet traffic for privacy and security.

Q: What is Artificial Intelligence?

A: AI refers to the simulation of human intelligence in machines.

Q: What is Machine Learning?

A: Machine Learning is a subset of AI that enables systems to learn from data.

Q: What is a Cloud Server?

A: A cloud server is a virtual server hosted on a cloud computing platform.

Q: How can I improve my memory for studying?

A: Use mnemonic techniques, repetition, and visualization.

Q: What is the best way to take notes?

A: The Cornell method and mind mapping are effective strategies.

Q: How does online learning compare to traditional learning?

A: Online learning is flexible, while traditional learning offers face-to-face interaction.

Q: What is a STEM subject?

A: STEM stands for Science, Technology, Engineering, and Mathematics.

Q: What are soft skills?

A: Soft skills include communication, teamwork, and problem-solving.

Q: How can I improve my memory for studying?

A: Use mnemonic techniques, repetition, and visualization.
